Data Model: Static Landing Page

Feature: 001-static-landing-page | **Date:** 2026-05-30

Overview

This is a static content page with no persistent data, no database, and no dynamic state. The “data model” describes the structured content entities that appear on the page, their fields, and their relationships.

Entities

Hero Section

Field	Type	Validation	Notes
project_name	text	Required, non-empty	“SuperSpec” “Specification-driven development for modern teams”
tagline	text	Required, non-empty	
cta_label	text	Required, non-empty	“Get Started”
cta_href	URL/ anchor	Required, valid href	#install (placeholder)

Feature Card

Field	Type	Validation	Notes
command_name	text	Required, non-empty	One of: status, brainstorm,

Field	Type	Validation	Notes
			tasks, execute, review
description	text	Required, 1-2 sentences	Brief description of command purpose
sequence_order	integer	Required, 1-5	Display order in grid and workflow

Workflow Step

Field	Type	Validation	Notes
step_number	integer	Required, 1-5	Sequential position
command_name	text	Required	Must match a Feature Card command_name
is_last	boolean	Derived	If step_number = 5, no connecting line after

Install Snippet

Field	Type	Validation	Notes
command	text	Required, valid shell command	npm install -g superspec
label	text	Optional	“Install” or similar heading text

Relationships

Hero Section (1) —contains— (1) CTA → links to Install Snippet
 Feature Card (5) —ordered by— sequence_order
 Workflow Step (5) —references— Feature Card.command_name

Static Data Instances

Feature Cards (ordered by sequence)

#	command_name	description
1	status	Check the current state of your specification and implementation progress
2	brainstorm	Generate creative ideas and explore solution spaces for your feature
3	tasks	Decompose your plan into concrete, actionable implementation tasks
4	execute	Run the implementation workflow, processing tasks in order
5	review	Verify the implementation against the specification and constitution

State Transitions

N/A — No dynamic state. All content is static and rendered at page load.
