Technology Stack

Layer	Technology	Purpose
[LAYER_1]	[TECHNOLOGY]	[PURPOSE]
[LAYER_2]	[TECHNOLOGY]	[PURPOSE]

Development Workflow

This project follows **specification-driven development** using the superspec pipeline:

1. **Constitution** (/speckit.constitution): Establish and maintain these governance principles
2. **Specification** (/speckit.specify): Define feature requirements before any code is written
3. **Brainstorming** (/speckit.superspec.brainstorm): Challenge assumptions and discover edge cases
4. **Planning** (/speckit.plan): Design technical approach with constitution compliance check
5. **Task Decomposition** (/speckit.superspec.tasks): Break down into executable, trackable tasks
6. **Execution** (/speckit.superspec.execute): Implement with appropriate discipline (TDD, subagents)
7. **Review** (/speckit.superspec.review): Verify implementation against spec and constitution

Workflow Rules

- No code is written before a spec is approved
- Every spec goes through at least one brainstorm session
- Implementation plans must pass a constitution compliance check
- Phase checkpoints require explicit human approval

Quality Gates

Testing Requirements

☐

Unit tests: [REQUIRED/OPTIONAL] — [coverage target or “none specified”]

☐

Integration tests: [REQUIRED/OPTIONAL] — [scope description]

☐

Contract tests: [REQUIRED/OPTIONAL] — [API boundary description]

☐

TDD discipline: [REQUIRED/OPTIONAL] — tasks marked [TD D] must follow RED-GREEN-REFACTOR

Review Requirements

☐

Code review: [REQUIRED/OPTIONAL] — [who reviews, what criteria]

☐

Spec compliance: [REQUIRED/OPTIONAL] — verify all acceptance scenarios pass

☐

Security review: [REQUIRED/OPTIONAL] — [scope description]

☐

Performance review: [REQUIRED/OPTIONAL] — [benchmarks or targets]

Deployment Gates

☐

All tests pass

☐

All review items resolved

☐

Constitution compliance verified

☐

[PROJECT-SPECIFIC GATE]

Governance

This constitution is the highest governing document for all development activities. Any amendment requires:

- Documented change rationale
- Updated related specs and plans
- Verification that core principles are not violated

Version: [CONSTITUTION_VERSION] | **Ratified:** [RATIFICATION_DATE] | **Last Amended:** [LAST_AMENDED_DATE]
