

CHANGELOG

Changelog (umbrella / _analysis)

Design and delivery changelog for the vasic umbrella repo.
Newest first.

v1.6.0 — Bold re-style (both sites)

Shipped a bold re-style on both properties, each generated as two distinct candidates with Candidate A shipping. **vasic.digital** adopted Candidate A “**MACHINA**” (Bricolage Grotesque display, sharp 0–4px corners, whole-page blueprint grid, GPU-only scanline/aurora motion, deep dark-red #8f1d2d hue kept); **milosvasic.ru** adopted Candidate A “**TERMINAL BRUTALIST**” (uppercase Anton display, 2px ink frames, hard offset print-shadows, engineering-grid texture, crimson #a31e39 hue kept). The rejected alternates — vasic “**VOLTAGE**” (Fraunces serif / frosted glass) and milos “**LUMINOUS CRIMSON GLASS**” (Fraunces serif / glass) — are retained as re-appliable drop-ins; their fonts are already deployed. New self-hosted OFL faces (latin+latin-ext, no CDN): Bricolage Grotesque + Fraunces on vasic, Anton + Fraunces on milos; Inter/ JetBrains Mono unchanged. Accessibility/safety verified from `_tests/evidence/restyle/`: **0 serious/critical and 0 total axe violations** on every page/theme, **0 horizontal overflow** desktop and mobile, milos behavior intact (hamburger, 15-item lang switcher, 15-lang download modal, back-to-top), and reduced-motion / reduced-transparency fallbacks in place. Rollback restore points: vasic **v1.5.0**, milos **v1.5.2**, umbrella **pre-restyle**. Full detail: [RESTYLE-v1.6.0.md](#).
