

SUMMARY

Live Audit — milosvasic.ru @ v1.6.0 (“TERMINAL BRUTALIST”)

- Scope: Read-only adversarial audit of LIVE <https://milosvasic.ru>. No edits/commits/deloys.
- Method: raw curl -sSL, Playwright 1.61.0 (chromium), @axe-core/playwright — all against live URLs.
- Date: 2026-08-07
- Verdict: PASS. 0 defects. 2 informational notes (Fraunces fonts absent-by-design; article-viewer has no reachable trigger).
- Every claim below is backed by a saved artifact in this directory.

PASS / FAIL / UNVERIFIED matrix

Defects found

None. No FAIL results. Two informational notes below (neither is a live-site defect — no broken requests, no user-visible breakage).

Note A — Fraunces fonts absent (by design, not a defect)

The brief expected assets/od/fraunces/* to serve 200. On live v1.6.0, Fraunces is NOT used: served od/milosvasic.css defines only @font-face for Anton, and the stack is Anton, "Space Grotesk", sans-serif / "Inter", sans-serif / "JetBrains Mono", monospace. Probed Fraunces paths 404, but nothing references them, so zero broken font requests (network scan: 0 responses ≥ 400). The restyle evolved away from Fraunces. N/A vs. stale brief expectation, not a defect.

Note B — Article-viewer modal has no reachable trigger

articles.js (200, loads cleanly) implements a “Read more” article modal fetching articles//.html from [data-article] triggers. Homepage article-card “Read more” buttons instead link to /products/*.html detail pages (real 200 pages); there are no [data-article] triggers anywhere reachable and no article/blog/news URLs in the sitemap. Modal open/close is UNVERIFIABLE from live pages (no content to open). Not a defect — no article content is wired up.

Key confirmations (adversarial highlights)

- Design renders live, not fallback: hero computed font-family Anton, "Space Grotesk", sans-serif, text-transform uppercase, document.fonts reports Anton status “loaded”. Verified light/dark/390px mobile.
- Red-line profile decoration = crimson bracket frame around portrait (top-right + bottom-left rules), both themes; accent -- od-accent:#a31e39 (light) / #f05a6f (dark).
- a11y: 0 axe violations (serious/critical/moderate/minor all 0) on all four sampled pages incl. RTL Arabic.
- All 45 PDFs served (200, application/pdf, 202KB-754KB); download modal renders all 15 languages.
- Zero console errors and zero HTTP ≥ 400 across every page/viewport exercised.
