Issue #50 — html lang attribute fix (milosvasic.ru localized pages)

Date: 2026-08-06

Root cause

milosvasic.ru/_layouts/default.html line 2 used `{{ site.lang }}` (always 'en'); milosvasic Jekyll page emitters set no page-level 'lang' front matter.

Fix

- `_layouts/default.html:2` -> `<html lang="{{ page.lang | default: site.lang | default: 'en' }}" ...>`
- `_tools/gen/product.go`: `renderProductJekyll` gains lang param; front matter emits 'lang: %s' via `htmlLang(lang)`
- `_tools/gen/portfolio.go`: `renderPortfolioJekyll` front matter emits 'lang: %s' via `htmlLang(lang)`
- `_tools/gen/home.go`: `renderHomeJekyll` front matter emits 'lang: %s' via `htmlLang(doc.Lang)`

BEFORE (rendered _site, pre-fix)

`products/ru/helixcode.html` : `<html lang="en"` (WRONG)
`products/de/helixcode.html` : `<html lang="en"` (WRONG)
`products/helixcode.html` : `<html lang="en"` (ok) `index.html` :
`<html lang="en"` (ok) `portfolio/index.html` : `<html lang="en"` (ok)

AFTER (rendered _site, post-fix)

```
products/ru/helixcode.html <html lang="ru" products/de/  
helixcode.html <html lang="de" products/helixcode.html <html  
lang="en" index.html <html lang="en" portfolio/index.html <html  
lang="en" portfolio/ru/index.html <html lang="ru" portfolio/de/  
index.html <html lang="de"
```

vasic.digital (unchanged, still correct)

```
products/ru/helixcode.html <html lang="ru" products/de/  
helixcode.html <html lang="de" products/helixcode.html <html  
lang="en" index.html <html lang="en"
```

Tests

```
go build ./... (from _tools/gen): OK go test -count=1 ./... (from  
_tools/gen): ok vasic.digital/tools/gen
```
