## Defect list

EMPTY — no defects found. All checks pass on both production sites.

## Notes (non-defects)

- Note A — VFX class naming: the v1.5.0 aurora/grid hero effects are served on vasic.digital under class names vd-hero\_\_fx (wrapper), vd-hero\_\_aurora, vd-hero\_\_grid (CSS keyframe vd-aurora-drift), NOT the literal tokens od-aurora/od-grid in the brief. Feature confirmed in served HTML (vfx/vfx-aurora-context.txt). Other tokens matched literally: vd-hero (x11), data-od-count (x3), od-magnetic (x3), od-glow (x34). milos home has none of these.
- milosvasic.ru also serves the full product/portfolio catalog (495 /products/ + 15 /portfolio/ localized URLs, own domain, all sampled 200) — by design, not a cross-site leak.
- One transient TLS reset on overlays.css during batch checks; immediate retry returned 200 (text/css, 4092 bytes). Recorded in d1d2/d1d2-assets.txt.
