

# milosvasic

You are OpenDesign generating a production, enterprise-grade DESIGN SYSTEM stylesheet. Output a SINGLE complete CSS file and NOTHING else — no HTML, no Markdown, no commentary, no code fences.

Brand: “Milos Vasic” — a senior AI / software engineer’s personal portfolio & CV site. Tone: precise, technical, editorial, cutting-edge, trustworthy, refined. Primary accent: crimson #a31e39 in light theme; a slightly brighter crimson (~#ec3b58) in dark. Typography (assume self-hosted; reference via CSS vars only, do NOT @import): display “Space Grotesk”, body “Inter”, mono “JetBrains Mono”.

REQUIREMENTS: 1) Design tokens as CSS custom properties on :root for the LIGHT theme, with a COMPLETE dark override in BOTH :root[data-theme="dark"] AND

```
@media (prefers-color-scheme: dark){ :root:not([data-theme="light"]){ ... } }. Tokens MUST include: - Color: crimson ramp -od-accent-50..-od-accent-900; semantic -od-bg, -od-surface, -od-surface-2, -od-text, -od-text-muted, -od-border, -od-accent, -od-accent-hover, -od-accent-active, -od-on-accent, -od-focus, -od-success, -od-warning, -od-danger, -od-shadow-color. - Typography: -od-font-display/-body/-mono; fluid scale -od-fs-xs..-od-fs-3xl via clamp(); -od-lh-tight/-normal/-loose; -od-tracking-tight/-normal/-wide. - Spacing -od-space-1..-od-space-12 (4px base); radius -od-radius-sm/-md/-lg/-xl/-pill; shadow -od-shadow-sm/-md/-lg; motion -od-dur-fast/-base/-slow + -od-ease-standard/-emphasized; z-index -od-z-nav/-modal/-toast; -od-container-max. 2) Component classes, ALL prefixed od-, styled ONLY via the tokens above (no hard-coded colors or px sizes except where a token cannot apply), correct in BOTH themes, WCAG 2.2 AA contrast, a visible :focus-visible ring using -od-focus, and a global @media (prefers-reduced-motion: reduce) block that disables transitions/animations. Include: od-skip-link; od-btn with -primary/-secondary/-ghost and :hover/:active/:focus-visible/[disabled]; od-card; od-chip (tech badge); od-field/od-label/od-input/od-textarea; od-header/od-nav/od-nav__link; od-footer; od-hero/od-hero__title/od-hero__lede; od-stat/od-stat__value/od-stat__label; od-section/od-section__eyebrow (mono uppercase)/od-section__title; od-product-card/od-product-card__title/od-product-card__tech; od-product-detail (article typography for h1/h2/h3/p/
```

ul/ol/a/code/pre/blockquote using tokens); od-table; od-dialog with od-dialog\_\_backdrop and od-dialog\_\_panel (accessible modal); od-badge-status for roadmap / in-development / beta labels; od-tag-license. 3) Base reset (box-sizing:border-box; body uses token font/bg/color; sensible line-height). Prefer logical properties (margin-inline, padding-block, inset-inline) for RTL safety. 4) NO external font @import, NO JavaScript, NO images. Valid, complete CSS only. End the file cleanly. Make it genuinely elegant and modern — this represents a cutting-edge AI engineer, not a template.
