

vasic-digital

You are OpenDesign generating a production, enterprise-grade DESIGN SYSTEM stylesheet. Output a SINGLE complete CSS file and NOTHING else — no HTML, no Markdown, no commentary, no code fences.

Brand: “Vasic Digital” — an AI-development company building cutting-edge AI tools and platforms (the Helix product family).
Tone: bold, modern, confident, high-tech, enterprise-credible.
Primary accent: red #dc3545 in light theme; a brighter coral-red (~#ff6b6b) in dark. Typography (assume self-hosted; reference via CSS vars only, do NOT @import): display “Space Grotesk”, body “Inter”, mono “JetBrains Mono” (shared foundation with the sibling brand — ONLY the accent color differs).

REQUIREMENTS: identical structure and completeness to a shared foundation: 1) Design tokens as CSS custom properties on :root (LIGHT) with a COMPLETE dark override in BOTH :root[data-theme="dark"] AND @media (prefers-color-scheme: dark) { :root:not([data-theme="light"]){ ... } }. Cover: a RED tonal ramp -od-accent-50..-od-accent-900 (centered so -od-accent-600/700 ~ #dc3545); semantic -od-bg,-od-surface,-od-surface-2,-od-text,-od-text-muted,-od-border,-od-accent,-od-accent-hover,-od-accent-active,-od-on-accent,-od-focus,-od-success,-od-warning,-od-danger,-od-shadow-color; typography -od-font-display/-body/-mono + fluid -od-fs-xs..-od-fs-3xl via clamp() + -od-lh-tight/-normal/-loose + -od-tracking-*; spacing -od-space-1..12 (4px base); radius -od-radius-sm/-md/-lg/-xl/-pill; shadow -od-shadow-sm/-md/-lg; motion -od-dur-fast/-base/-slow + -od-ease-standard/-emphasized; z-index -od-z-nav/-modal/-toast; -od-container-max. 2) Component classes, ALL prefixed od-, styled ONLY via tokens, correct in BOTH themes, WCAG 2.2 AA contrast (ensure text on any colored badge/button is AA in BOTH themes — do NOT use -od-bg as text color on warning/success fills), visible :focus-visible ring via -od-focus, and a global prefers-reduced-motion block. Include: od-skip-link; od-btn (-primary/-secondary/-ghost + :hover/:active/:focus-visible/[disabled]); od-card; od-chip; od-field/od-label/od-input/od-textarea; od-header/od-nav/od-nav__link; od-footer; od-hero/od-hero__title/od-hero__lede; od-stat/od-stat__value/od-stat__label; od-section/od-section__eyebrow (mono uppercase)/od-section__title; od-product-card/od-product-card__title/od-product-card__tech; od-product-

detail (h1/h2/h3/p/ul/ol/a/code/pre/blockquote via tokens); od-table; od-dialog/od-dialog__backdrop/od-dialog__panel; od-badge-status (+ -roadmap/-in-development/-beta, all AA); od-tag-license.

3) Base reset; prefer logical properties (margin-inline, padding-block, inset-inline) for RTL. NO external font @import, NO JS, NO images. Valid complete CSS only, ending cleanly. Make it bold and cutting-edge — an AI company's flagship design language.
