Contract — What a claim must carry

Every claim states its population

source · in_process · served. The same figure over different populations is a different fact, and reporting one as another is this project's most-repeated defect — four times in one day.

The canonical instance: **on disk 42 areas / 30 with an assessment / 224 questions; on the wire 39 / 14 / 116.** Both readings correct. Only one described the product.

Every claim carries its state

A build identifier, a corpus fingerprint, or both. **A reading with neither cannot be trusted once the tree moves** — and this tree moved all day. A measurement bracketed by identical fingerprints is attributable; one that is not must say so.

Every check is three-valued

0 satisfied · 1 a real finding · 2 could-not-determine. A finding outranks a could-not-determine, which outranks clean. **A 2 is never recorded as satisfied.**

Every check ships a paired proof

Mutations are **DATA** — fixtures, env vars, arguments — **never edits to the thing under test**. The subject’s source hash is captured before the battery and re-asserted after.

Each battery carries:

- a **control that goes green** — a battery of only refuse-to-pass cases is satisfied by a gate hardwired to fail;
- a **vacuity refusal exiting 2** — an absence assertion over an empty set has checked nothing;
- where the check forbids something, an **overreach mutation** — the legitimate case that must NOT fire.

Every check states its population

The SET is justified independently of the count it produces. Three defects in one day were instruments aimed at the wrong set while reporting cleanly. If you add a case and then check whether the number moved, you are tuning to a result.

Every known gap is recorded

With its reason and **who may lift it**. An exemption is a claim about a file at a moment in time, and changing the file can falsify it silently.

Currently admissible, measured after rebuild and restart

Claim	Population	Verdict
39 served / 3 held back / 42 total	served	rc 0
27 areas with a test, 205 questions	served	rc 0
318 of 318 lessons carry a body	served	rc 0
four sections with carry-forward	served	rc 0

Claim	Population	Verdict
205 of 205 video anchors resolve	served	rc 0
7 hue families (floor 6), 200 contrast pairings	served, bracketed	rc 0
answer key absent while locked	served	rc 0
498,580 cross-reference edges, generation 7	served	rc 0
1,933 boundary rows judged, 0 disclosures	source	rc 1 by design
